Possible Issue	Migration Plan
Plain text tokens in DB	Hash access and refresh tokens
Applications misconfiguration	Ensure prod env uses prod apps
Transfers can corrupt user data	Rollback transfer in case of error
DB Connection is exposed	Use SSL
Raw SQL injections	Implement field validation
User can get access to others files	Implement owner verification
Shared files can be reshared	Implement share restriction for shared files
Shared files can be potentially infected	Scan file for malwares before sharing
Phishing and spam	Implement 2FA
